SUMMARY

Full Stack Developer with hands-on experience across frontend, backend, and mobile. Skilled in building scalable applications with React.js, Next.js, and Node.js, plus production payment systems, serverless APIs (Cloudflare Workers), and PostgreSQL/Supabase backends. Experienced in Agile teams and the full development cycle — from clean, maintainable code to production deployment, including cross-platform mobile (React Native, Capacitor).

WORK EXPERIENCE

Frontend Developer - Travacco

Oct 2025 - Present

- Contributed to a large-scale SaaS travel management platform used by agencies across multiple countries.
- Improved invoice automation flows, stabilized complex API integrations, and optimized system performance for real-time operations.
- Worked closely with backend and product teams to ensure smooth workflows and high-quality feature delivery.
- Gained production-level experience with high-volume data, enterprise workflows, and TypeScript-based architecture.

Fullstack Developer - DiscoverG

May 2026- Aug 2026

- Built the full stack: React + Vite frontend and a serverless API on Cloudflare Workers (Hono), with Supabase (PostgreSQL, Auth, Row-Level Security) as the data layer.
- Designed the Stripe payment system end-to-end: PaymentIntents, webhook reconciliation, idempotent bookings, refunds/disputes, and provider payouts via Stripe Connect with platform commission.
- Integrated multiple external suppliers — hotels (Hotelbeds, RateHawk, Amadeus) and flights (Duffel) — with cross-supplier deduplication, circuit breakers, retries, and health diagnostics.
- Implemented auth & security: JWT, role-based access, CSRF, rate limiting, and KYC verification (Veriff).
- Authored PostgreSQL migrations and RPCs; added i18n for 6 locales (incl. RTL Arabic).
- Packaged cross-platform mobile apps for iOS & Android with Capacitor (deep links / universal links); set up CI/CD (GitHub Actions) and tests (Vitest, Playwright).

Frontend Developer – Baku Design Academy | MVP Project

Aug 2024 - Dec 2024

- I took on the frontend development startup (VAT Fiscal Data Analysis Project) and delivered a launch-ready product.
- Collaborated closely with experienced Product Owners (PO), QA engineers, Data Analysts, and Backend developers.
- Built a high-performance, user-friendly interface using React.js and modern UI/UX principles.

Fullstack Developer – ITB Techno

Nov 2023 - Sep 2024

- Gained hands-on experience working on real-world projects, contributing to the entire software development process.
- Developed user-friendly interfaces using HTML, CSS, JavaScript, and React.js during frontend development tasks.
- Collaborated effectively with experienced developers in a team environment, contributing to various stages of project development.

EDUCATION

Azerbaijan Technical University - Intellectual Systems (master)	2026 - present
Baku State University - Computer Science (bachelor)	2022 - 2026
Code Academy - Full Stack Development	Sep 2024 - Jan 2025
IT Brains Academy - Frontend Development	Jun 2022 - Dec 2022

ADDITIONAL INFORMATION

- **Technical Skills:**
 - Frontend: HTML5, CSS/SCSS, Tailwind, Bootstrap, JavaScript, TypeScript, React.js, Vue.js, Next.js, Responsive Design
 - Backend / Cloud: Node.js, Express.js, Cloudflare Workers, Hono, Supabase, PostgreSQL/SQL, Stripe & Stripe Connect, REST APIs, Zod
 - Mobile: React Native, Capacitor (iOS & Android)
 - DevOps / Testing: Git, GitHub, GitHub Actions (CI/CD), Vitest, Playwright, Jira
 - Databases: MongoDB, PostgreSQL
- **Languages:** English(B2), Azerbaijani(C2), Korean(A2)
- **Soft Skills:** Teamwork, Attention to Detail, Research and Analysis, Critical Thinking, Problem Solving, Adaptability, Time Management

SOME PROJECTS

- DiscoverG — Full-stack travel marketplace (React, TypeScript, Cloudflare Workers, Supabase/PostgreSQL, Stripe). Built the frontend and serverless backend with full Stripe payments, hotel/flight supplier integrations, and cross-platform mobile (iOS & Android) via Capacitor.
- Travacco – A SaaS travel management platform offering invoice automation, financial tracking, and agency workflow tools (Next.js, TypeScript, REST API).
- Esshop Baku – Real-world project; product catalog and e-commerce functionality for an online multilingual, SEO-optimized shop website (Next.js, CSS, i18n).
- StendLab – Real-world project; product catalog and e-commerce functionality for an online shop (React, Tailwind CSS).
